

## Project Design Phase-II

### Data Flow Diagram & User Stories

Date	27 June 2025
Team ID	LTVIP2025TMID31198
Project Name	Laptop Request Catalog Item
Maximum Marks	4 Marks

#### Data Flow Diagrams:

A Data Flow Diagram (DFD) is a simple and clear way to visually show how information moves through a system. It helps us understand where the data comes from, how it is processed, and where it is stored or sent. In our project, we used a DFD to clearly map out each step involved in creating and testing a Service Catalog Item. This helped our team visualize the data flow between users and different parts of the system, making it easier to plan and build the solution accurately.

## User Stories

Using the below template we list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Employee	Create Service Catalog Item	USN-1	As a user, I want to request a laptop using a catalog item so that I can work properly	I can fill and submit the catalog request form	High	Sprint-1
Admin	Add Variables	USN-2	As an admin, I want to add fields like laptop type and justification in form	Variables are shown in form	High	Sprint-1
Admin	Create Catalog UI Policies	USN-3	As an admin, I want to show/hide fields based on input	Fields are dynamically shown/hidden	Medium	Sprint-1
Admin	Create UI Action	USN-4	As an admin, I want to add buttons for form submission or cancellation	Buttons appear and function properly	Medium	Sprint-1
Developer	Export Changes to other Instance	USN-5	As a developer, I want to export the update set to another instance	Update set is exported successfully	High	Sprint-2
Developer	Retrieve the Update Set	USN-6	As a developer, I want to retrieve and preview the update set	Update set is retrieved and previewed	High	Sprint-2
User/Admin	Test Catalog Item	USN-7	As a user, I want to test the laptop catalog item for accuracy	Catalog item is working as expected	High	Sprint-2
